github.com/RaulMandujano
evano.dev

Full-stack developer who ships production software end to end — from architecture and UI to deployment. I build **scalable SaaS platforms**, **AI-powered automation**, and have hands-on experience keeping enterprise **CRM / ERP systems** running and integrated with e-commerce. I turn business problems into reliable, well-engineered products.

EXPERIENCE

- Co-Founder & Full-Stack Developer

2021 — Present

Evano Development · Utah (Remote)

 - Design and ship multiple live SaaS platforms end to end — architecture, front-end, APIs, and deployment.
 - Build AI-driven automation and CRM tools integrating OpenAI GPT, local LLMs, and the Meta / WhatsApp APIs.
 - Deliver multi-tenant products with real-time data, OAuth 2.0, and serverless infrastructure on Firebase.
- Dynamics 365 Expert

2023 — 2025

Mrs. Fields · Utah

Microsoft Dynamics 365 — enterprise CRM & ERP platform.

 - Owned day-to-day reliability of the Dynamics 365 CRM/ERP, keeping core business operations running without disruption.
 - Designed and built new automated workflows inside the ERP to streamline orders, inventory, and customer data.
 - Integrated Dynamics 365 with **Shopify Plus**, syncing e-commerce orders, products, and customers so the full system operated as one.
 - Troubleshoot and resolved data and process issues across the ERP to keep teams unblocked and the platform healthy.

TECHNICAL SKILLS
